

**Title:**

Assistant Professor - Robotics and Manufacturing

**Department:**

Electrical and Computer Engineering

**Position Type:**

Faculty, tenure track

**Position Summary:**

The Helen and John C. Hartmann Department of Electrical and Computer Engineering (ECE) at New Jersey Institute of Technology (NJIT) invite applications from outstanding individuals for tenure track assistant professor faculty positions with primary focus on control and embedded systems for robotics and automation, industrial robotics and robots for manufacturing, collaborative robotics, integrated human robotics (e.g., assistive and wearable robotics), robot perception and sensing, micro-robots, soft robotics, autonomous vehicles and mechatronics.

**Essential Functions:** teaching and research in relevant fields of engineering and applied science. We seek candidates with a demonstrated ability to conduct research at the highest level, and with a commitment to outstanding teaching and mentoring of students.
